**DETAILED ACTION**

1. Claims 1-7 have been examined.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5 & 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are generally directed to a system or apparatus; however, it is not clear what structural elements create the system. In claim 5, for example, it is not clear what element belongs to the electronic purse system. Further, Claim 6 appears to claim nothing more than an electronic data carrier such as a smart card. Also, it is not clear how something like a smart card (electronic purse or electronic data carrier) by itself could perform the method of claim 1.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3621

5. Claims 1,2,4 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6427140 to Ginter et al.

Referring to claims 1, 4 and 7, Ginter et al. disclose maintaining a plurality of user groups that are allowed to use said system by using a float ID (i.e. "group id") that is characteristic for each user group for uniquely associating each money flow effectuated by a person throughout said system with a respective user group; in which the float ID is used to separately track the money flows associated with said float ID throughout said purse system, from the purse card up to a purse provider's accounting system; a computer program comprising code portions adapted for performing the steps of the method of claim 1 when said program is loaded into a secure access module (see col. 8, lines 27-30; col. 9, lines 29-32; col. 159, lines 8-9; col. 237, lines 1-16; col. 269, lines 13-15; abstract).

Referring to claim 2, Ginter et al. disclose the method in which for each load or debit process, or for accumulated process data form previous load and debit processes, a data set is generated which comprises said float ID (see col. 155, lines 16-27).

***Allowable Subject Matter***

6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3621

- US Patent No. 5309516 to Takaragi et al. disclose a method for communication between terminals wherein a group key/ID is used to communicate between terminals with IC cards. A group key is generated and used by an originator and a plurality of communication partners for secure transmission of a message between the partners.
- "Europay: Common Electronic Purse Specifications released" discloses the released of common electronic purse specification (1<sup>st</sup> version).
